

WV^{OLV}

West Virginia Online Verification

Electronic *Insurance* VERIFICATION

By January 1, 2014, all insurance companies will be required to link-up with West Virginia's online insurance verification system (WV^{OLV}) to verify your auto insurance policy information electronically. This new process is a streamlined way to verify your information for renewals, at traffic stops, and for crash investigations. Additionally, it will help the DMV identify those who have dropped their insurance coverage which will reduce the number of uninsured motorists on the roadway with you!

Please bring in or mail a copy of your certificate of insurance (WV-1) next time you renew your vehicle registration. This will provide the DMV with the most accurate information about your insurance.
