MEMORANDUM

TO: ALL DISTRICT MATERIALS SUPERVISORS

FROM: DM *Pam F*

**SUBJECT: DIVISION APPROVED HOT-MIX ASPHALT (HMA)
DESIGN LABORATORIES**

Section 4.1 of Materials Procedures (MPs) 401.02.22 and 401.02.28 require HMA laboratories performing Marshall and Superpave mix designs to obtain Division approval. The most expeditious means of demonstrating such ability is by submitting to this Division a copy of their latest inspection report by the AASHTO Materials Reference Laboratory (AMRL), together with a letter detailing the actions of any deficiencies noted. To maintain approved status, a laboratory must have a satisfactory inspection approximately every two years. These MPs require that the design laboratory be staffed with a technician who has attended and successfully completed a Division approved class on HMA mix designs.

The attached tables list the laboratories meeting the requirements for designation as a "Division Approved Laboratory" for Marshall and Superpave mix design testing.

Should you require additional information, please contact Mr. Stewart Groves of this Division at (304) 558-9894.
